

This is an announcement to all present and future FAC members...and anyone currently perusing this site for information about the Flying Aces Club.

We are a group of kindred souls who love the hobby of free flight rubber powered scale models.

The FAC is not a democratic organization. I am but the third Commander-in-Chief (originators Thompson and Stott count as one). At best, we CinC's have been charged as benevolent dictators. We have had our close supporters, advisors and now a multi-person Council to give...what else...but council.

The GHQ Council was created to be the voice of the membership. If you have any issue with the FAC you should take it to a Councilman. They are located nation-wide and now in the Montreal area. If that person cannot give you 100% satisfaction, please contact me directly. I now have the time and energy to address every concern personally. My

contact information is on this site and in every issue of our great newsletter. If necessary I will get the whole of Council involved with your concern.

I believe we now have a proven record that any and all issues are dealt with. You will be heard and you will get feedback. You will be within a loop of communication. After all, as a member of the FAC... you are a member of a world-wide family.

Thank you for your interest in the FAC. Thank you for being a member. Thank you for your participation. Enjoy this wonderful hobby...it helps sustain the Spirit of the FAC.

Ross P. Mayo

Commander-in-Chief

(Your Benevolent Dictator)
