### **Note**

In identifying eligible designs, I've used SAM and NFFS approved design list, and source catalogs.

Designs are designated as in the SAM and NFFS lists if applicable, or in the source plan catalog

Column A indicates the authority for including a design as eligible for this FAC event.

A 1937-1942 SAM approved list

B 1943-1950 NFFS approved list

C 1934 – 1950 Source catalog.

Only one geared design is included because I didn't think there would be much interest.

Designs are normally sorted by Designer, Design and Year Design (Sort 1) for the convenience of most users.

On request I will sort the list otherwise and email it at no charge. Options are:.

Sort 1 Designer, Design, Year

David is very modest about his plans. To Quote him:  
"These drawings of half size Wakefields are working drawings for people who know how to build small models. I have tried to draw them as accurately as possible in keeping faithful to the outlines I. I have found in 3-views in various sources, ie. magazines, full size Size plans and the internet. In no way do they represent the final word" We are fortunate that he has consented to share them to share them at his cost of \$5.00 each post paid"
